

**Firmware Technologies Inc. delivers Vistime for SharePoint plug in, offering the world's most powerful collaboration and multi-file viewing platform.**

Perth, Western Australia July 14<sup>th</sup> 2010.

The Vistime for SharePoint plug in empowers organizations to mine the wealth of its knowledge resources across the enterprise.

Vistime for SharePoint ( [www.vistime.com](http://www.vistime.com) ) saves organisations time and money as team members interact immediately, enabling real time collaboration through the world's most powerful multi-file format viewer and online collaboration tool.

Vistime for SharePoint (V4SP) is the world's first collective intelligence management solution that combines the powerful online collaboration and versatile universal file viewer of Vistime, with the "enterprise search, accelerating shared business processes, and facilitating information-sharing capabilities " of SharePoint.

*" Vistime for SharePoint creates an opportunity to extend the collaboration capabilities of any file type in a SharePoint library, by providing a tool to instantly discuss, markup, and annotate the file in a Vistime conference with the entire enterprise – with no latency and no degradation in quality. V4SP increases the effectiveness of crucial decision making on key data."*

Jacques Blandin President Firmware Technologies Inc

Vistime for SharePoint allows a session owner to invite colleagues, clients or any number or nominated participants into a secure session during which, all involved will be able to simultaneously view and interact with any supported document, image, video or 3D image through a simple and common interface, without the need for the originating software.

Vistime for SharePoint delivers meaning based computing technology that assists in automated decision making in over 70 applications that have embedded SharePoint's solution and has the plug-in capacity to support over 1000 different file formats and connect to 400 different types of information sources.

**About Vistime**

Vistime has been designed to integrate with the existing product offerings of the world's leading web collaboration and enterprise content management system vendors. Firmware's technology enables these vendors to immediately expand their product capabilities and service offerings through Integrated Product Offerings, white label and Private Label Offerings and OEM opportunities. Firmware Technologies are also negotiating major health care technology partnerships in Europe and the USA.

Through its unprecedented rapid visual rendering capabilities, the system ("vistime", [www.vistime.com](http://www.vistime.com)) allows all end users to simultaneously view, manipulate, and explore multi-dimensional data visualizations of **any file type** and **of any size**, in real-time **without** any resolution degradation.
